

## SEMI AUTO STICKER LABELING MACHINE

Next Packaging's Semi-Automatic Labelling Machines are used to label the cylindrical or round objects/bottles like cough syrups, face wash tubes, tins, jars etc.

With a compact design, the machine is easy to maintain as well as operate. Its remarkable rigidity and durability is exceptional, ensuring a long-life.

### Top-Notch Qualities

#### Easy Pre-length Adjustment

Unlike other machines where sensors need to be adjusted manually according to the label length of the specific product, our highly advanced sticker labelling machine has controller in which you just need to feed the pre-length of your label via the digital panel. Moreover, the sensor is fixed and offers ease of operation to its users.

#### Premium Finishing Quality

Also, the finishing quality is of premium nature and the resultant product would look catchy on the shelf.

#### Working

After adjusting the mechanical and the sticker roll in the machine, just place the bottle manually at the designated area and press the handle accordingly to get the product labelled with a high-quality touch.

#### Features:

- Label dispensing speed adjustment up to 7 mtr/minute
- Label Pre-Ejection (Adjustable)

- Base of the machine - AL with Anodizing

**Add-on Features (On Special Request):**

- Online Batch/Bar Code or Inkjet printer can be mounted for printing variable data like Batch No, Manufacturing Date, Expiry Date, MRP, Product Name, Ingredients, Address etc. along with Serial No. & Bar Code
- Auto Pneumatic Pressing Feature to reduce manual work
- Batch Coding Arrangement
- Additional Motor System for extra massage of bottle

**Technical Specifications**

- Speed: 8-16 Labels Per Minute (Depends upon Label Length)
- Label Material: Paper, Film, PE, PP
- Bottle Size: 15-110 mm (Diameter)
- Machine Accuracy:  $\pm 1.5$  mm
- Motor: AC induction motor
- Label Sensor: sick make or equalent
- Power: 220V/50 Hz
- Pneumatic: Not Required
- Change over time: 2-5 Mins
- Cables: Finolex
- Machine body: Aluminum make
