BOX STRETCH WRAPPING MACHINE WITH PRE STRETCH FACILITY:

We manufacturer technologically advanced stretch wrapping machine that are used in wrapping a wide range of products ensuring complete safety and durability. These are widely used in the packaging of Carton Boxes of medicines, garments, chemicals and many more.

SPECIFICATION OF BOX STRETCH WRAPPING MACHINE WITH PRE STRETCH FACILITY.

- Power Supply: 220VAC, Single Phase, 50Hz
- Power Consumption: 0.75Kw
- Speed: Adjustable platform Speed through Variable Frequency Drive
- Packing Size: 500 x 500 x 500mm
- Product Resting Plate: Dia 600mm
- Drive Motor: Bonfiglioli Make AC Motor with Gear Box
- Box Locking Arrangement: Adjustable
- Unwinding of Stretch film: Motorised through Rubber Roller

- Stretching Of Film: Adjustable: Through VFD
- No of Wrap: Adjust the count of Wrap around Box through Counter
- Emergency Stop
- Stainless Steel Roller for film Unwinding
- Heavy Duty Fabrication Body Duly Powder Coated

SILENT FEATURES:

- ❖ Provides inexpensive method of protecting carton boxes and similar products from moisture and damage during transportation.
- ❖ Very high through output - up to 120 packs per hour.
- ❖ Easy manipulation of load to provide bi-directional wrapping.
- ❖ Digital display of Stretch counters and less film consumption.
- ❖ Suitable for industries like Apparels, Garments, computer components, handicrafts and food products packed in Carton boxes.
- ❖ Optional - Pneumatic cylinder with top platen models.

Thanking you and assuring you of our best product and services at all times.

SPECIAL FEATURES OF BOX STRAPPING MACHINE

ELECTRO-MAGNETIC CLUTCH TRANSMISSION.

A unique transmission with high quality electromagnetic clutch, which can extend motor working life, speed up strapping and eliminate the machine noise and parts worn out, is used on the machine.

INSTANT HEAT DESIGN AND NO HEATING ELEMENT REQUIRED.

The heater blade is made up of one-piece-die-cast nickel steel to which the heat can be instantly transferred; completely eliminate heater blade's oxidation and short circuit of the conventional heating element problems.

ADVANCE PCB CONTROL SYSTEM

An advanced easy to replace printed circuit board (PCB) is designed to control feeding, tensioning, sealing, cutting, cooling time of strap welding and other functions of the machine for low maintenance and easy operation.

HIGH TENSION AND EXTRA LARGE PACKAGE STRAPPING.

The special cooling time of strap welding designed in the PCB is to suit the extra large package and high tensioning application.

MULTIPLE CHOICE OF STRAP WIDTH

Strap width adjustment control with a simple adjustment guide, which will allow you to use a choice of 4 strap of size – 6mm, 9mm, 12mm, & 15mm

SAFETY DESIGN

All switches mounted on the machine are with DC 24v for safety reason and no electrical shock worry.

ADVANCED STRAP COIL HOLDER DESIGN

An advanced strap coil holder design eliminates the strap jammed due to conventional strap coil hook used.

SIMPLE OPERATION

No more complicated operating procedure, simply insert the strap tip into the slot of the top table of the machine. No training is required.

UNIQUE LS1 DESIGN OUTSIDE THE MACHINE ASSEMBLY

Greatly increase the LS1 working life, eliminates the possibility of damage due to sliding plate movement.

EASY TENSION ADJUSTMENT

No tool is required. Outside tension adjustment knob enable easy and quick change. The outside tension adjustment knob is only available in our model. Infinitely adjustment strap tension up to 70Kgs to secure different types of products.

ENERGY SAVING

Advance electronic design enables motor to stop after each cycle to save energy. Eliminate continues running and extend motor working life.

SPECIFICATIONS OF L-SEALER-

- Sealing Dimension: 30" (W) X 30" (L)
- Adjustable working Platform.
- Power: 230VAC, Single Phase, 50Hz.

FEATURES OF L-SEALER

- Adjustable Sealing timer
- Safety Cut Off System for Sealing Blade
- Sealing System – Blade type
- Tortion Rod
- Stainless Steel Rollers for Roll Stand
- Silicon Gasket against sealing Blade
- Chrome plated accessories
- Copper winding Transformer

OPTIONAL EATURES

- Burn off switch
- Magnetic hold on
- Product Take Away Conveyor with AC geared motor
- Gas Spring System

SPECIFICATIONS OF SHRINK TUNNEL

- Tunnel Size – 30" (W) X 12" (H) X 50" (L)
- Heating Zone – 50" (L)
- Heating Load – 6-9 KW
- Conveyor Speed - Variable
- Power - 440V AC, Three Phase, 50Hz.

FEATURES OF SHRINK TUNNEL

- Adjustable Tunnel Temperature Controller.
- **Silicon Roller Type Conveyor System**
- Adjustable tension setting for conveyor.
- Variable speed of conveyor to suit the production rate and for better finish of the product. (AC GEARED MOTOR WITH VFD)
- Conveyor Motor AC Motor with AC Drive
- Adjustable Conveyor Speed
- High Velocity Turbo Design with adjustable Air Flow
- Works with POF & PVC Shrink Film
- Shrink Product Of Many Different Shapes And Sizes
- High Quality Heating Elements
- Adjustable Height of the Machine

(Demand draft payable at Pune for parties located outside Pune) prior to dispatch of the machine after pre delivery inspection & approval at our works.

Advance or Security deposit payment once received will not be refunded under any circumstances in case of order cancellation.

Delay of remittance of more than 10 days after inspection and approval or 20 days after calling for inspection shall attract interest @2.5%per month.

In case of failure to make payment even after a further grace period of 4 weeks after this 20 days period, we reserve the right to treat your order as cancelled and in such cases the security deposit shall be forfeited.

gst

"INSPECTION & TRIALS" - A2.

When the machine is ready for the trial, we shall inform you well in advance for the inspection & trials of the same. You shall be requested to depute your inspector to our works for full working trial of the machine within 10 days latest, for this purpose we shall require the following well in advance.

- a) Adequate quantity of your product which is required to be shrink wrapped.
- b) Adequate quantity of consumable (at your cost) required for trials.

"ERECTION & COMMISSIONING" - A3

Erection commissioning charges are Rs.1800/- per day of 8 Hrs. You shall also agree to pay to and fro first/second class railway fare / bus fare from Pune to your factory. (Air fare if you require his service urgently). Free Boarding and lodging to be provided by you of Rs.1800/- per day shall be charged extra.

Local conveyance to be provided by you or will be charged extra at actual. Skilled or unskilled labor as required to be provided by you to assist our erector up to the erection commission work is completed. Lifting tackles any other tools etc required during erection to be provided by you.

Any delay in the commencement of the erection because facilities are not ready at your end. We shall be forced to charge for the number of days our erector attends the works. Moreover after completing the erection of the equipment if there is any delay in commissioning the machine due to non availability of materials, we shall charge for these number of days also when our erector will have to wait until facilities are provided and the unit is commissioned. Alternatively we shall return back to Pune and additional to & fro expense shall be to your account.

Kindly confirm these charges in the purchase order itself.

VALIDITY: Our quotation will be valid for 30 days from the date of offer

FORCE MAJOR:

We shall not responsible for the failure or delay in executing the order due to acts beyond our control such as war, Fire, strike, labour problems, accidents, government acts or requirements or shortage of labour or materials.

FREIGHT: Extra, on your account.

WARRANTY:

We hereby declare that the stores offered by us guaranteed against defective materials or workmanship for a period of 12 months from the date of dispatch, on the basis of single shift working. Under this guarantee, we undertake to replace or repair at our discretion any defective part that may need replacement or repair for reasons of defective workmanship or material brought to our notice within the stipulated guarantee period. This provision shall not apply if the damage or defect is caused by improper use, faulty erection or commissioning, natural wear and tear, faulty or improper handling, overloading, using unsuitable lubricants, defective foundation etc.

OTHER SPECIAL CONDITIONS:

An imposition of new levies, either by the Central or State Government or any variation in the rates of Taxes, Excise Duty, etc. at the time of delivery of the machine will be to your account.

ERRORS AND OMISSIONS EXCEPTED

If you want any other information or clarification please feel free to contact us. We are most thankful to you if you give us a chance to serve your esteemed organization. We look forward to receive your valued order.

ABOUT THE CONSTRUCTION OF THE TUNNEL:

We are offering you the tunnel of rigid construction, which will have the Teflon Mesh Belt TYEP CONVEYOR to pull the load of around 20-40 Kgs.

The fabrication of the tunnel is very superior quality, made up of ms sheet. We use only quality material in the construction of the machine.

To avoid the heat loss and heating of external body of the Tunnel, we use the ceramic wool and the sufficient layers of the asbestos sheets from all sides with all necessary precautions to avoid the air loss. In the construction of our tunnel the ducting of hot air is having unique special design by which the concentrated hot air will be blown on the product very efficiently for the better results of the product finish. There is proper air circulation inside the heating zone to minimize the shrinking time. The openings of the tunnels are closed by Teflon cloth and woolen material.

All the fasteners used in the heating zone are of SS only.

ELECTRICAL CONTROLS:

Well designed and aesthetic control panel is provided with all necessary control instruments. It consists of Electronic Temperature Indicator cum controller, Electronic timers. Control switches Etc. for fullest control of all machine operation parameters.

The control panel is designed for safe, trouble free and consistent working and is provided with necessary interlocking controls and arrangement to safeguard the machine as well as the operator.
