Features of our Semi-Automatic blowing machine:

No.of cavity:4

Blowing Capacity of machine - **1600-1800BPH**

Mould:

- Maximum mould thickness-**150mm**,
- Minimum mould thickness -**140mm**
- Clamping Force- 15 ton

Oven:

- Number of Preform Holders-**67**,
- Number of Heating Modules- **1**
- Number of Heating Zones - **6**
- Lamp Power- **2000 W**
- Lamp Length -**1120mm**

Stretching:

- Number of Stretch Rods-**4**
- Stretching Stroke Max.-**450 mm**

Technical specifications:

- Infrared pre-heating system
- Chain Conveyor similar to fully AUTOMATIC machine
- Steady preform rotating in pre-heater
- Janatics pneumatic system & water cooling system
- Hydro-pneumatic Locking systems with operating manual

Swami Samarth

requested subsequently it may delay the MANUFACTURER will not be liable for any claims or losses due to delayed deliveries.

Machine specification:

The performance parameters and characteristics as well as physical specifications of machine are generally in conformity within the sales contract only. After signing sales contract there will no liability for characteristics and specifications which are given in published catalogue or previous offers or any other media.

Ours is an organization with a technological base and therefore development is a continuous process. In order to serve the PURCHASER better, MANUFACTURER reserves the right to decide the specification and features of the machines which would be best suitable to the PURCHASER'S requirements. The selection and supply of machine would solely depend on information of the product/s to be packed, packaging material, working environment and general perception of the performance requiems indicated by the PURCHASER in purchase order

Installation:

Installation along with an extensive on-site training of machine will be given by our expert engineer to operator at free of cost. Only lodging, boarding and local conveyance has to arrange by purchase. You have to inform hotel name and address and booking confirmation in advance. PURCHASER will have to provide power along with packing inputs & compressed air.

Machine Commissioning:

Before delivery of machines, MANUFACTURER will send installation check list which PURCHASER has to fill and need to give confirmation by returning checklist with sign and stamp. After receiving receipt of confirmation along with signed checklist, we see that machines are properly installed, and conduct test runs to see if they are in perfect order and ready for operations. Subsequently, the service engineer will instruct customer's personnel about operation and maintenance of machines.

Machine Operator:

Machine operator should be technical person .i.e. ITI OR DME Etc. if machine operator is technically illiterate the manufacturer will not be responsible for any damage or low production or below efficiency operation.

Buyer's scope:

1. Power: the system requires stabilized 415 V AC, 3phase, 50HZ electrical supply. There should not be variation in frequency and voltage.

Purchase has to arrange the same.

2. Compressed air: The compressed air of constant pressure and required CFM as mentioned in sale contract shall be arranged for pneumatic operation of each machine as given in sales contract.

3. Material: Sufficient quantity of product of all type & film rolls of each size of packing material per machine for all quantity to be packed shall be arranged for trail and test run of the equipment at site.

4. Atmosphere: The place of system installation shall be dust free .we recommend use of effective dust control system to avoid interruption of machine operation due to dusty atmosphere nearby the machine.

The ambient temperature should be 10 to 50degree Celsius. There should not be any frying or baking or any generation process near or inside the packing room where machine has installed.

If any different ambient temperature needs like frozen area should be informed in written along with sale contract. Any other requirement of wash proof dust proof or any should be conveyed in written along with sale contract.

In addition it is recommended that the place of installation shall be covered to avoid entry of foreign particles in product room.

5. Un-loading and placing of machine: Machine should be properly unloaded & unpacked by the PURCHASER and should follow the instructions given by MANUFACTURER in manual or in installation check list. Machine should be placed properly on floor on spirit level and as per the layout provided.

6. Tools and equipment for installation: Crain, hoist or tackles or any other tools or equipment required for installation should be provided by PURCHASER.

Warranty:

One year from the date of delivery for faulty material & working defect except electrical, electronic parts. The supplier's warranties will be pass on to PURCHASER for all brought out items. Every possible care & protection has been taken to ensure quality in respect of material & workmanship in machine By MANUFACTURER.

Warranty Period:

During warranty period, should any defect be found in machines during normal use and proper handling in accordance with our maintenance and operation manuals and other instructions applicable to machines, MANUFACTURER will repair or at our option, replace free of charge (Parts Cost Only) that prove to be defect in manufacture within a period of one year from the date of dispatch of machine. : MANUFACTURER will replace or repair defective parts at their works or site. Product warranty operates on A 'Return to Base' principle.

MANUFACTURER is not liable for any eventual damage of parts arising out because of non-use of machine, improper storage, mis-handling, cannibalizing of parts and climate conditions. MANUFACTURER is not liable in the matter of consequential loss or damage caused due to failure of parts, delay in any, at the repairing workshop or site in carrying out repairs to machine shall not be ground.

For extending the warranty period nor shall give any right to the PURCHASER for claiming any compensation for damages or production loss.

MANUFACTURER reserves the right either to repair or replace the defective parts, where the defective part can be replaced by part of alternative brands which are normally used by MANUFACTURER in course of manufacturing.

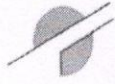

PURCHASER is fully responsible to convey chemical properties/natures of the product to be packed so as to avoid damaging of machine components and performance deterioration. Warranty stands for proper machine operation for packing the products to be packed which is

mentioned in purchase order or sales contract and mutually agreed by MANUFACTURER & PURCHASER.

Site Requests/Utilities for Machine Commissioning:

Non-compliance by PURCHASER of "Site request / utilities" recommended by MANUFACTURER for machine commissioning, such acts are not liable for accepting blame and compensation by MANUFACTURER.

PURCHASER is requested to arrange for commissioning of the machine within 45 days from the date of dispatch

The warranty offered stands null & void

1. If non-standard spare-parts are used on machine
2. If machine is shifted from the original place of installation without the prior consent of manufacturer and without the presence or help of service engineer of MANUFACTURER

Warranty condition for spare parts:

Supplies of spare parts do not carry warranty for free replacement once fitted and used on machine .any queries related to problem in space parts fitment and functioning asking for replacement or wrong parts receipt should be raised within one week of dispatch date.

All defective parts that are replaced shall come into our possession.

Repair Expenses:

Repair expenses for damage or defects that present themselves after the warranty period shall be borne by customers in accordance with our prescribed rates.

The repair expenses comprise parts cost, shipping charge, labour cost, and traveling expenses and statutory levies if any.

If defective parts that have replaced free of charges during the warranty period are not returned to us or to a place we specify within two (2) weeks of replacement, despite our request for such return, parts cost shall be borne by customer.

Warranty is not applicable:

1. Rubber parts like seal kits of cylinders, gaskets, and packing's. Bellow, pneumatics pipes, Parts made of plastic, PVC, glass Etc.
2. Parts of machines those have been subjected to mishandling, & improper maintenance. (Please refer the instruction in the operation and maintenance manual).
3. Wear 7 tear to non compliance of normal operation like cleaning, lubrication of moving parts and required setting of machine as given I O & M manual, Damages resulting from lack of preventive and periodic maintenance as mentioned in the machine manual
4. Electrical items like bulbs, fuses MCB, contactors, transformer, coils, heaters, temp controllers thermocouples, sensors, electronic cards, motors, HMI, PLC, drives Etc. (Other than the supplier's warranty if any).
5. Failure of electronic controls, cards due to supply voltage and frequency problem, mishandling And Repairs by Un-Authorized Person/ Agency.
6. Modification and conversion done by PURCHASER without authorization of MANUFACTURER.
7. Damage to the machine totally or partially in transit at the time of unloading or movement within plant at PURCHASER end.

8. Damage caused by force major such as earthquake, fires, floods, riots etc. and other causes beyond our control.
9. Damage caused from the use of machine under extraordinary operating conditions, such as or under inappropriate environments such as excessively high or low ambient temperatures, highly humid or dusty atmosphere.
10. Damage from the use of machines in combination with any auxiliary equipment of Devices not approved by MANUFACTURER or regarded as unsuitable for technical reasons. Customers are advised to inform us of the equipment or devices they intend to use, and ask for our written approval with regards to the combined use with machine.
11. Any consequential damage attributed to primary defects, which have been left unattended or ignored.
12. Damage or malfunctions caused by inappropriate or defective shop facilities like foundations too poorly built and finished to permit machines to be leveled and aligned, power source with fluctuating voltage and frequency beyond tolerance limit, poor earthing of machine etc. or by insufficient maintenance of facilities.
13. Damage resulting from misuse or improper or inadvertent operation or handling of machine or damage during transit /transportation.
14. Damage or defects of machines purchased from a third party, and any damage resulting from any repair, replacement or overhaul done 'By' A third party other than MANUFACTURER. As for machines overhauled by MANUFACTURER, the warranty is subjected to a separate agreement to be concluded between Purchase and MANUFACTURER prior to overhaul.
15. Damage or defect caused by machine malfunctions from incorrect voltage, frequency exceeding tolerance limit specified in our maintenance and operation manuals.
16. Any damage or defects of machine resold, loaned, or relocated to a third party without return notice to MANUFACTURER and MANUFACTURER'S written approval.

Delayed Lifting Fees:

The PURCHASER should necessarily depute their representative for inspection and clearance within a mutually agreed schedule. Delay in lifting machine beyond the agreed schedule will attract delayed lifting charges at the rate of 0.2% per day of order value for the first week. 0.5% per day for the next one week and 1% per day thereafter.

The delayed lifting fees would be adjusted against the advance paid. If the lifting of the Machine gets delayed beyond one month then the advance will be forfeited and the MANUFACTURER is Free to divert the machine elsewhere. if the PURCHASER wants the machine, thereafter, then it would be treated as a fresh order for which a fresh advance is required to be paid and the price would be charged at the rate ruling at the of delivery.

Usage:

These Machines are for commercial use only & are usage. Not a consumer good.

Force majeure:

In event of dislocation of works in the establishment of the contract owing to strikes, breakdown, accident, trade disputes and/or cause beyond control delivery may be partially or
