एक्स्पेलरमे चेम्बर बिना वजन उठाये ही मिजागरेपे खुलता है ।

ACCESSORIES & SPARE PARTS.

टाईनीटेक एक्सपेलर की विशेषता :

1. टाईनीटेक एक्सपेलरमे चालु स्थिति में ही खली मोटी या पतली करनेकी सुविधा है।
2. टाईनीटेक एक्सपेलरमे चेम्बर पेटी सिर्फ बोल्ट ढीला करके क्लेम्प निकालने से ही वजन उठाये बिना ही मिजागरेपे खुल सकता है। इसलिए काम करना आनंददायक है। किन्तु दुसरे एक्सपेलरमे भारी वजन उठाना पड़ता है।
3. टाईनीटेक एक्सपेलरकी पीनीयन शाफ्ट (साइड शाफ्ट) 2.5" मतलब की 63 मी. मी. जाड़ी होने से कभी टूटने का भय नहीं है। ये व्यवस्था सिर्फ टाईनीटेक एक्सपेलरमे है। दुसरे एक्सपेलरमे पीनीयन शाफ्ट पतली होने से टूट जाती है और अंतमे पेड़ेस्टल रखकर सहारा देना पड़ता है।
4. टाईनीटेक एक्सपेलरमे फ़िल्टर पंप एक्सपेलरके आगे के भाग मे एक्सपेलरके शाफ्ट के उपर ही लगाया जाता है।
5. टाईनीटेक एक्सपेलर, किटली और मोटर फ़ाउंडेशन फ्रेम के उपर ही लग जाते है। इसलिए सिमेन्ट या रेती की कोई जरूरत नहीं है। इस कारण एक दिन में ही मील चालू कर सकते है। ये सुविधा आर्शीवादरूप है।
6. टाईनीटेक एक्सपेलर मे बेल्टगार्ड होनेकी वजह से अकस्मात का भय नहीं रहता है।

NOISE:

When mill is running it is very silent. There is no noise.

PROFITABILITY :

Generally if this plant is run sincerely, payback time is only 90 days and this plant if maintained well, you can run TINYTECH OIL MILL PLANT for about 75 years. Machinery sold by our company before 30 years is still working perfectly well.

INSTALLATION:

1. Installation is very easy. During 5~6 days only, you can install the machinery and start the production of oil. This is modular type plant so ready foundation frames will be supplied and you have to simply place the expeller and electric motor on it and connect it by V belt as shown in our catalogue / web site. Foundations of any machines in ground not required.
2. It is complete project and mostly you need not purchase anything locally except to make electric connections and caballing.
3. It becomes very compact unit as there is no intermediate counter shaft. It occupies less space and you can shift the machinery very easily from one place to another as and when required.
4. We will supply detailed DVD of working oil mill plant, which will be extremely helpful to you to install and start oil mill easily by yourself. In this DVD we have shown 4 different working oil mills at 4 different places and watching the same will give you perfect training about TINYTECH OIL MILL installation and running successfully and confidently.

MAINTENANCE :

We understand importance of spares. We send full spare parts kit along with machinery itself, so that customers do not need to contact us for spares for about 2-3 years.

However whenever customers need spares, we give them top priority as we understand there is production loss as well as labors salary is ongoing. So we provide spares with fastest possible speed.

OIL PACKING :

1. Now a days empty bottles and jerry cans of different size and shape available with cap in the market and as soon as you close the cap, cap will be sealed and if anybody will open the cap, seal will be broken. We will provide nice metal funnel (suitable to fill oil in bottles) with oil mill machinery free of cost.
2. So no extra expensive packaging machinery is required.

Working TINYTECH oil mill:

You can see videos in our YOUTUBE channel [TINYTECH PLANTS](https://www.youtube.com/channel/UCcHd54KQlj1aio14mzYpR1A) which are very interesting to gain further knowledge of machines.

SALIENT FEATURES OF TINYTECH PLANTS OIL EXPELLER

1. Our oil expeller is unique in the world. We have developed this oil expeller in collaboration of German NGO called FAKT.
2. Accordingly, our expeller has a facility to open and close the chamber cage without lifting any heavy weight. All expellers of the world require lifting almost 120 kg of weight while closing the cage and also while opening the cage. We have devised our chamber cage to open the cage on hinges without lifting any weight. This is unique system in our expeller.
3. Our oil expeller has facility to change thickness of oil cake while running of expeller. All expellers of India have to be stopped 3 to 4 times for changing the thickness of oil cake from 10 mm to 3 mm. Our expeller runs continuously while changing the thickness of oil cake. So this is also unique facility in our expeller.
4. Oil pump for filter press is integral part of our oil expeller. All other expellers has to run filter pump by belt which is separately installed.
5. We have unique system of readymade foundation frame on which oil expeller and electric motor is mounted and hence no foundation to be dig in the ground. Most of the Indian expeller requires foundation in the ground which takes 7~10 days.
6. All above facilities have been developed during collaboration with Germany which continued for 5 years for up gradation of technology. And hence our oil expeller is unique throughout the world.
7. So our oil expellers & tiny oil mills are very much popular in the world & at present working most successfully in **90+ countries**.

SALIENT FEATURES OF OUR COMPANY (TINYTECH PLANTS)

1. Our company has come into existence only for benevolent purpose of rural development, employment generation, and poverty eradication and for implementing principles of Swadeshi preached by Gandhiji.
2. So far we have exported our tiny oil mills into **90+ countries** where all our tiny oil mills are running successfully, satisfactorily and profitably.
3. World bank also appreciated our activity by publishing one article about us, **"A LITTLE COMPANY WITH BIG IDEAS "**.
4. Our activity has been appreciated worldwide by many humanitarian scientists, technology workers, rural development enthusiasts and so many others.
5. Almost 1200 business people, humanitarian activists and rural development workers have visited us personally from 70 different countries and they have highly appreciated our activity.
