## 1. INTRODUCTION

---

We have supplied and installed more than 1 million Weighing Machines in India and these machines are maintained by our service team. We would like to take this opportunity to introduce our company as pioneers in the field of weighing with more than 90 years of experience in India. Our major highlights compared to any other suppliers in this field are as follows:

a. Service

We have eleven service centers in India. Our head office in Pune holds the biggest of the eleven with more than 7 service engineers catering service in Maharashtra and other parts of the country. Other than the above, our service centers in various other parts of the country cater services to the respective areas with at least two or more service engineers in each location.

b. Technical Support

Our service team is well equipped with highly qualified, factory trained service engineers, who will always be available to serve you to the maximum possible, extend, thereby helping you to have an uninterrupted operation of the machines and also in reducing the down time of machines.

c. Spares

Our Central warehouse located in Pune is equipped with the entire necessary spare parts required for the operation of the machines. **We hold spares for any product for a period of 10 years from the date of withdrawal of that product.** This along with above mentioned service facility will help you to reduce the downtime of the machine in case of any repairing required.

d. Service Contract

The quality and performance of the EAGLE electronic Weighing Scales along with our excellent service facility has helped us in gaining a subsequent market share. These machines are serviced by our service team with their maximum efficiency and any breakdown call is attended within a short notice, thus ensuring minimum downtime of the machines. We hope the above clearly proves our efficiency to provide you the necessary after – sales service locally

**B. LOADCELL:**

Copyright@prashantbhalerao

**Features:**

- We offer a precision engineered range of double ended shear beam load cells with cup & ball mounting arrangement which are designed to offer optimum accuracy under harsh working condition.
- Our ranges of Double Ended Shear Beam Load Cells with Cup & Ball arrangement are corrosion resistant, moisture resistant, encapsulated from heat and dust for providing optimum output in tough environments.
- The Load Cell is IP68 protected.
- Due to the cup & ball mounting design the load is transferred unilaterally on the load cell without giving side impacts to the load cells and lateral restrainers are not required.
