Report for Cotton (Kapas) (Week ending 06 August 2023)

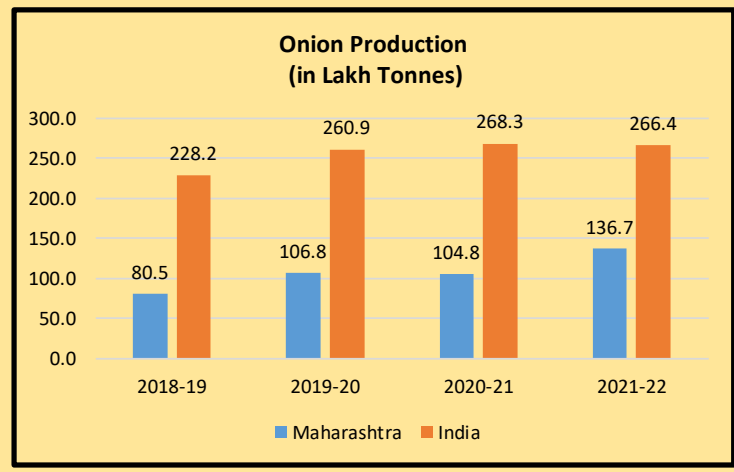

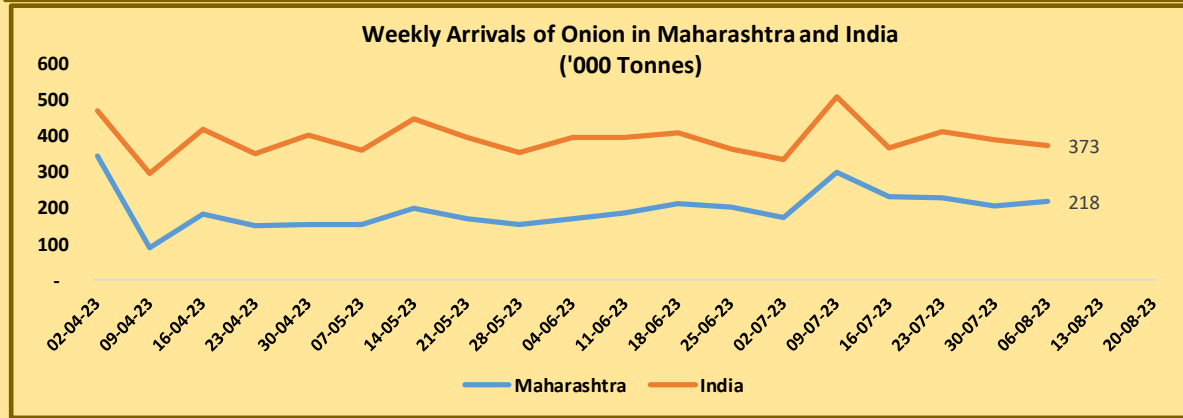

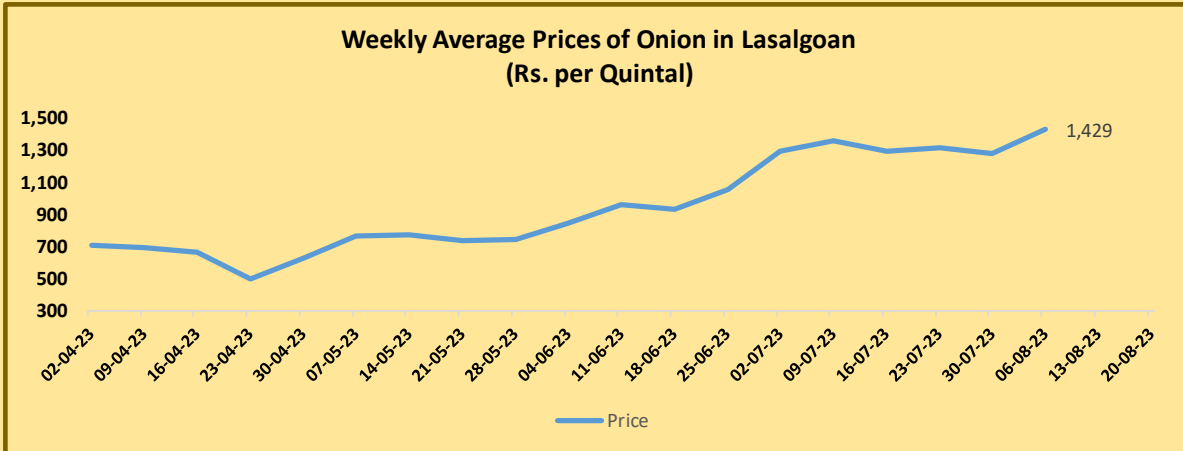

As per NFSM data, Heavy rains have been witnessed in the key growing regions of cotton crop. Presently, sowing is lagging by 10% across India. At Agriwatch, we expect sowing to decrease by around 5-10% for the 2023-24 season.

As the weather unfolds, understanding of the global supply situation will improve. Global economic growth is expected to be sluggish and there have been widespread reports of inventory accumulation throughout supply chains.

6. Onion
