Hi Sarang,

As discussed yesterday, we are in the process of finalizing and developing input forms for the staff performance system.

As per our discussion on the 6th of November, we will work on developing the input forms and share the source code with you upon completion.

Kindly let us know a suitable time to discuss any technical requirements or clarifications needed to ensure smooth development.

PFA

Thanks &amp; Regards,

Dear Sir,

Based on the discussion in the meeting and the MOM shared thereafter , we have discussed with the project section and as per the primary discussion we are good to go.

We need to have official approval from the Project section.

The only issue is we want to have a meeting with the Cloud Service provider.

But currently the Cloud Service provider has stopped all the services and so the web portals are not accessible. So we are not able to provide the required data.

Thanks &amp; Regards,

Dear Sarang,

As discussed, we require a test API for one or more districts with the following requirements:

- 1. **Test API:** The API should provide employee details as per the attached file. If any data is missing, we will coordinate with the Establishment department.
- 2. **New Details:** At the Taluka level, new details need to be created for the Establishment Officer, who will act as the first user in the Staff Performance module.
- 3. **Hierarchical Structure:** The API should include a proper hierarchical structure for the following roles: Establishment Officer, Agri Assistant, Agri Supervisor, CAO, and TAO.

As per your confirmation, the API will be prepared once the cloud services for the Mahakrushi application are activated and will be shared with the Amnex team.

The Amnex team has already initiated development, and the test API is crucial for creating the first input form for the Establishment section, enabling auto-fetch of employee details.

Looking forward to your prompt action.

Thanks & Regards ,

Dear Sarang,

We have checked above mentioned API and found the following observation:-

1. Establishment officer - Login and API are not available ( As mentioned you have asked to use TAO -Credentials for this role)
2. API Data field available:

Only "id": 11817,  
 "last\_name": "Dhage",  
 "first\_name": "Devendra",  
 "middle\_name": "Hanxmant",  
 "email": "taoxaval@gmail.com",  
 "MMobile": "XX22514707",

No other data is available for auto-fetch as mentioned in the Excel sheet. We will discuss this issue with the Establishment Department and Project Section to get these details.

Please confirm the same.

Thanks &amp; Regards,

Dear Sarang and Kalyan,

We need a 15-minute discussion regarding the API, as we are encountering issues with the hierarchical structure. Specifically, we have TAO login credentials but are seeing multiple village names instead of CAO and Agri Assist details.

Kindly confirm the meeting schedule for 12:30 PM today.

Thanks &amp; Regards,

Hi Kalyan,

As discussed in the last meeting, we had requested the APIs for the **TAO** and the **Establishment Officer** to merge into the code. These APIs are essential for us to verify the flow of the application. Since the **Establishment Officer** is the very first form in the application, we cannot proceed to the subsequent forms without its login credentials and API integration.

Currently, we are using the same API for **CAO** in place of **TAO**. However, during the demo, the CAO form will be visible under TAO, which is incorrect. Additionally, the Establishment Officer form will not open without the proper login credentials and API.

We also request you to provide data for the **entire district** instead of just one taluka. This is necessary for comprehensive testing.

We request you to kindly prioritize this task and provide the required APIs and data at the earliest.

#### To summarize, we urgently require:

1. The API and login credentials for the **Establishment Officer**.
2. The **TAO API**.
3. Complete district data, as one taluka data is insufficient for validation and testing.

Thanks & Regards,

When logging in as **Agri Assistant**, two work locations are appearing. Could you confirm which **Work Location ID** we should consider to fetch the **Reporting Officer details** from the **CAO API**?

- **Credentials:** AA – 9119480375

Password:- #Project123#.

```

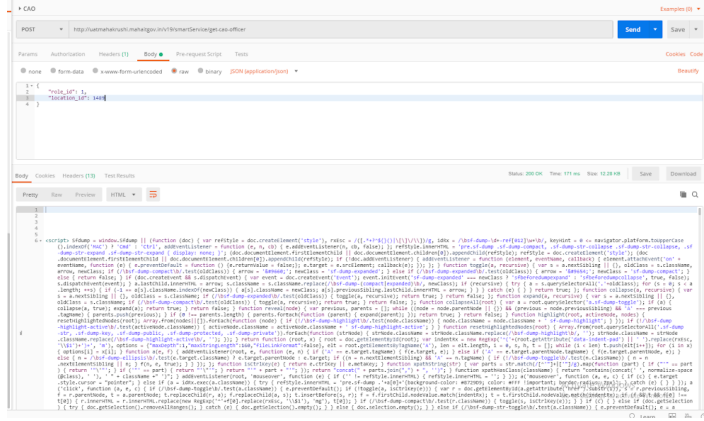

1 {
2   "mob": "9119480375",
3   "pass": "#Project123#"
4 }

27 {
28   "subject_name_eng": null,
29   "subtopic_name_eng": null,
30   "work_location": [
31     {
32       "work_location_id": 1489,
33       "work_location_name": "Ambavade",
34       "work_location_code": "4190_1_3",
35       "subdivision_id": 2,
36       "subdivision_name": "Pune"
37     },
38     {
39       "work_location_id": 1490,
40       "work_location_name": "Zikhkhalann"
41     }
42   ]
43 }

```

When we are passing work location ID- 1489 & roll ID- 1, in CAO API, Then getting this type of error.  
Both Work location and roll ID is for Agri Assistant  
credentials- AA - 9119480375

Password- #Project123#  
We get error-

Please check and resolve these issues.

Additionally, please provide the **TAO API**, as it is required to set the **form flow**. We won't be able to demonstrate the **TAO form flow** unless we receive the API, and also provide **Establishment API**.

Kindly return info to error and provide the necessary API at the earliest.

Dear Sir,

We would like to inform you that Mahakrishi does not have an establishment officer as a separate user; therefore, we are unable to provide establishment officer details. However, we have already shared the details for CAO, AS, and AA under the TAO login.

Regarding your new requirement, if an Agriculture Assistant login requires an upper-level reporting user, we will discuss this matter with Sarang Sir.

Additionally, please note that Mahakrishi has been facing server-related issues since 13th January 2025. As a result, we are currently unable to proceed with the development of new APIs.

Hi Kalyan,

As discussed, I have created a table outlining what has been received, what is pending, and the dependencies affecting the demo. Please review it for better clarity.

Additionally, please discuss with Sarang regarding the requirement of an upper-level and lower level reporting user for the Agriculture Assistant login and provide an update on the same.

We also request you to check the API availability at the earliest, as it is crucial for setting up the correct workflow and ensuring a smooth demo.

Kindly find the detailed demo issues and dependencies attached below for reference.

Login API	Credentials Received	API Received	Hierarchy API Received	Notes	Demo Issues Due to API Unavailability
Establishment	No	No	No	We have not received any API for the Establishment Officer.	There are no login credentials for the Establishment Officer. Currently, we are using the TAO Hierarchy API, so TAO tasks are also getting assigned to the Establishment Officer. This affects the proper flow of CRs, making it difficult to verify them.
AA	Yes	Yes	No	We have not received the hierarchy-wise API for AA, which is essential for forwarding and reverting forms (Forward to CAO & TAO, Revert to Establishment).	Currently, forms can be forwarded to CAO, but CAO cannot view them due to the unavailability of the hierarchy API. To demonstrate the process, we have used static credentials for the demo.
AS	Yes	Yes	No	We have not received the hierarchy-wise API for AS, which is essential for forwarding and reverting forms (Forward to CAO & TAO, Revert to Establishment).	Similar to AA, forms can be forwarded to CAO, but CAO cannot view them due to the unavailability of the hierarchy API. Static credentials have been added for the demo.
CAO	Yes	Yes	No	We have not received the hierarchy-wise API for CAO, which is essential for forwarding and reverting forms (Forward to TAO, Revert to AA/AS & Establishment).	Currently, all CRs of AA/AS appear under a single login in CAO, making the flow static. Once we receive the hierarchy API, we will be able to set up the correct workflow.
TAO	Yes	Yes	Yes	TAO API has been received.	Currently, TAO Hierarchy API is being used, which results in TAO tasks also getting assigned to the Establishment Officer, affecting the proper flow of CRs. Additionally, since the hierarchy API is missing for CAO, we have had to use static credentials for the TAO demo. Once the correct hierarchy API is provided, the flow will be properly implemented.

Dear Sarang,

As discussed, we require a test API for one or more districts with the following requirements:

1. **Test API:** The API should provide employee details as per the attached file. If any data is missing, we will coordinate with the Establishment department.
2. **New Details:** At the Taluka level, new details need to be created for the Establishment Officer, who will act as the first user in the Staff Performance module.

3. **Hierarchical Structure:** The API should include a proper hierarchical structure for the following roles: Establishment Officer, Agri Assistant, Agri Supervisor, CAO, and TAO.

As per your confirmation, the API will be prepared once the cloud services for the Mahakrushi application are activated and will be shared with the Amnex team.

The Amnex team has already initiated development, and the test API is crucial for creating the first input form for the Establishment section, enabling auto-fetch of employee details.

Looking forward to your prompt action.

Dear Sir,

Mahakrishi has been experiencing server-related issues since January 13th, 2025. As a result, we are currently unable to proceed with the development of new APIs. Regarding your new requirement, if the Agriculture Assistant login requires an upper-level reporting user, the development of the API will begin once the issue is resolved.

On Wed, 29 Jan 2025 at 15:30, Niraj Mankar <niraj5@amnex.com> wrote:

Hi Kalyan,

As discussed, I have created a table outlining what has been received, what is pending, and the dependencies affecting the demo. Please review it for better clarity.

Additionally, please discuss with Sarang regarding the requirement of an upper-level and lower level reporting user for the Agriculture Assistant login and provide an update on the same.

We also request you to check the API availability at the earliest, as it is crucial for setting up the correct workflow and ensuring a smooth demo.

Kindly find the detailed demo issues and dependencies attached below for reference.

Login API	Credentials Received	API Received	Hierarchy API Received	Notes	Demo Issues Due to API Unavailability
Establishment	No	No	No	We have not received any API for the Establishment Officer.	There are no login credentials for the Establishment Officer. Currently, we are using the TAO Hierarchy API, so TAO tasks are also getting assigned to the Establishment Officer. This affects the proper flow of CRs, making it difficult to verify them.
AA	Yes	Yes	No	We have not received the hierarchy-wise API for AA, which is essential for forwarding and reverting forms (Forward to CAO & TAO, Revert to Establishment).	Currently, forms can be forwarded to CAO, but CAO cannot view them due to the unavailability of the hierarchy API. To demonstrate the process, we have used static credentials for the demo.
AS	Yes	Yes	No	We have not received the hierarchy-wise API for AS, which is essential for forwarding and reverting forms (Forward to CAO & TAO, Revert to Establishment).	Similar to AA, forms can be forwarded to CAO, but CAO cannot view them due to the unavailability of the hierarchy API. Static credentials have been added for the demo.
CAO	Yes	Yes	No	We have not received the hierarchy-wise API for CAO, which is essential for forwarding and reverting forms (Forward to TAO, Revert to AA/AS & Establishment).	Currently, all CRs of AA/AS appear under a single login in CAO, making the flow static. Once we receive the hierarchy API, we will be able to set up the correct workflow.
TAO	Yes	Yes	Yes	TAO API has been received.	Currently, TAO Hierarchy API is being used, which results in TAO tasks also getting assigned to the Establishment Officer, affecting the proper flow of CRs. Additionally, since the hierarchy API is missing for CAO, we have had to use static credentials for the TAO demo. Once the correct hierarchy API is provided, the flow will be properly implemented.

Thanks & Regards,

On Tue, 21 Jan, 2025, 12:25 pm Niraj Mankar, <niraj5@annex.com> wrote:

Hi Kalyan,

As discussed in the last meeting, we had requested the APIs for the **TAO** and the **Establishment Officer** to merge into the code. These APIs are essential for us to verify the flow of the application. Since the **Establishment Officer** is the very first form in the application, we cannot proceed to the subsequent forms without its login credentials and API integration.

Currently, we are using the same API for **CAO** in place of **TAO**. However, during the demo, the CAO form will be visible under TAO, which is incorrect. Additionally, the Establishment Officer form will not open without the proper login credentials and API.

We also request you to provide data for the **entire district** instead of just one taluka. This is necessary for comprehensive testing.

We request you to kindly prioritize this task and provide the required APIs and data at the earliest.

**To summarize, we urgently require:**

1. The API and login credentials for the **Establishment Officer**.
2. The **TAO API**.
3. Complete district data, as one taluka data is insufficient for validation and testing.

Thanks &amp; Regards,

**Niraj Mankar**

On Tue, 17 Dec 2024 at 17:24, Dipak Patil <[dipak2@amnex.com](mailto:dipak2@amnex.com)> wrote:

Dear Sarang,

As discussed, we require a test API for one or more districts with the following requirements:

- Test API:** The API should provide employee details as per the attached file. If any data is missing, we will coordinate with the Establishment department.
- New Details:** At the Taluka level, new details need to be created for the Establishment Officer, who will act as the first user in the Staff Performance module.
- Hierarchical Structure:** The API should include a proper hierarchical structure for the following roles: Establishment Officer, Agri Assistant, Agri Supervisor, CAO, and TAO.

As per your confirmation, the API will be prepared once the cloud services for the Mahakrushi application are activated and will be shared with the Amnex team.

The Amnex team has already initiated development, and the test API is crucial for creating the first input form for the Establishment section, enabling auto-fetch of employee details.

Looking forward to your prompt action.

Dear Sarang,

If the cloud issue is resolved please send test data for one district and the addition of the Establishment Department login ID.

We have already started development and these details are required as early as possible.

If required we will arrange a meeting to discuss the same.

Thanks & Regards,

Dear Sir,

Based on the discussion in the meeting and the MOM shared thereafter , we have discussed with the project section and as per the primary discussion we are good to go.

We need to have official approval from the Project section.

The only issue is we want to have a meeting with the Cloud Service provider.

But currently the Cloud Service provider has stopped all the services and so the web portals are not accessible. So we are not able to provide the required data.

Thanks & Regards,

Dear Sarang ,

in addition please give them test data for employee master.

Please confirm if there is any issue.

- प्रत. -१. मा. अतिरिक्त प्रकल्प संचालक, प्रकल्प समन्वयन व व्यवस्थान कक्ष, स्मार्ट पुणे यांना विनंती की, आपले कार्यालयातील संबंधित अधिकारी व तज्ञ यांना बैठकीस उपस्थित राहणेकरिता आपले स्तरावरून सुचित करावे.
२. मा. सहसंचालक, आस्थापना, कृषी आयुक्तालय, पुणे. व्दारा कृषी उपसंचालक (कर्मचारी कल्याण) यांनी सदर बैठकीस उपस्थित रहावे.

## Minutes of Meeting

<b>MEETING DESCRIPTION</b>		
<b>Meeting Name</b>		
DLI 1.2 (IT Based MIS System) and DLI 1.3 (Staff Performance Module)		
Date	Time	Location
06.11.2024	11.00 AM	SMART Office @ Pune

<b>MEETING PARTICIPANTS</b>	
Present	Present
SMART <ul style="list-style-type: none"> <li>▪ Shri Uday Deshmukh- Additional Project Director</li> <li>▪ Smt. Ujawala Bankhele – Nodal Officer, PIU Agri</li> <li>▪ Shri. Arun Kamble – CB Expert</li> <li>▪ Shri. Manik Trambake – Agri. Expert and PST Mgmt Expert</li> <li>▪ Shri. Dnyaneshwar Tasare – HRD and CB Expert</li> <li>▪ Smt. Pratibha Kutal – Technical Officer</li> <li>▪ Shri. Rajendra Patel -MIS Expert</li> <li>▪ Smt Shravani and Aniket – PwC</li> </ul>	Other <ul style="list-style-type: none"> <li>• Mr. Sarang Korde- E &amp; Y</li> <li>• Mr. Niraj Mankar - Amnex</li> </ul>

The following points are discussed and suggested that the same needs to be attended for the Staff Performance Module and Other Module for taking development under ANMEX assignment.

Sr. No.	Points Description	Action required	Responsibility
1	Under DLI-1.3  Development of the Staff performance module	1. Amnex has collected all necessary requirements and received approval for the input form containing master details of all employees. 2. Approval has also been granted for various administrative forms, including self-appraisal, reporting officer approval, and reviewing officer approval. 3. During the meeting, it was suggested that the input form for employee master details should be available on the Mahakrushi web application, with a single sign-on system to streamline access through Mahakrushi. 4. CoA IT Team suggested logging into the Mahakrushi application (single sign off) and redirecting users to the SMART platform for additional forms. Alternatively, Amnex could develop the required forms and pass them to CoA IT Team for further processing on the DoA server	PIU Agri/ CoA IT Team / SMART  DoA  CoA IT Team / ANMEX

		<p>5. SMART will consult with Amnex management regarding the technical and security requirements for redirecting users to other websites.</p> <p>6. Sign-off for forms / wireframe from welfare department / PIU agri from competent authority.</p> <p>7. SMART will also discuss with Amnex management the development of four forms, with the intention to hand over the source code to the DoA for further processing.</p> <p>8. Amnex will enable system login through the Maha Krushi application API, with further form development and deployment on the SMART/DoA server.</p> <p>9. SMART will arrange a technical meeting with Amnex and CoA IT Team for further progress upon confirmation from PIU Agri.</p>	
	Nursery Inventory Management system	<p>10. The DoA suggested developing a nursery inventory management system based on the existing SRS and wireframe. SMART will discuss this proposal with Amnex management and confirm accordingly. also, PIU Agri will take consent and communicate formally to PCMU from competent authority and consent for the initiative.</p>	PIU Agri/ SMART
2	Under DLR 3.1 Scheme implementation and financing converged on the basis of cluster/ commodity development plans developed	<ul style="list-style-type: none"> <li>• For submission of report of Cotton and Soyabean 20 cluster data will be provided to CoA IT team by PIU Agri. and CoA IT team will provide MAHADBT scheme detail data of those 20 clusters.</li> <li>• Further analysis will be performed data analyst available with PIU Agri.</li> <li>• Final report preparation of decided clusters /Blocks will be completed by PIU Agri.</li> </ul>	PIU Agri. / CoA IT Team

**Conclusion: -**

1. PIU Agri will communicate further details regarding the staff performance management system and other development task like Nursery Inventory Management.
2. CoA IT Team will provide details of soybean and cotton cluster.
3. SMART will discuss the next steps with Amnex management for further proceeding with consent from competent authority.
